PELICAN™ ELITE COOLERS » ICE RETENTION

Pelican™ Elite Coolers can carry ice for multiple days. The key is keeping the cooler sealed as much as possible and using the ice-type that will work best for your needs. We suggest using Pelican™ ICE Packs on the bottom, placing your contents inside, and filling the remaining space in the cooler with crushed ice. Keep any melted ice in the cooler until you are done with use. Ice-water helps keep everything chilled, air does not.

WHAT KIND OF ICE

For short term use, typical crushed ice works well. If you plan to use your cooler for more than 48 consecutive hours we suggest using the Pelican™ ICE Packs.
