## Crip ilta

Grip-Rite ${ }^{\circledR}$ offers a comprehensive assortment of high-quality, light and mediumgauge fence fabrics in woven and welded meshes. All Grip-Rite fencing is made from recycled steel.

Grip-Rite fencing and wire products are available nationwide in a variety of styles and sizes. Easy-to-read labels show common applications, making the products easy to identify and easy to choose for each project.

Contractors, agriculturalists, vintners, and homeowners alike all turn to Grip-Rite for their fencing and wire needs.

## Fencing

## How To Select The Right Fence

A good fence works as a barrier to either enclose or exclude and can be made of several kinds of materials. Wire fence can be different heights and appearances, and if chosen correctly, can provide the consumer with peace of mind and a good return on their investment. There are many types of fence products and each is designed to perform a specific function.

## Choose The Right Coating

## Galvanized

Galvanized wire is zinc coated to resist rust and corrosion and will last longer than uncoated wire. Common coatings include: Commercial, Class 1, and Class 3. The higher the coating weight, the longer the expected resistance to rust and corrosion.

## Vinyl Coated

Vinyl coated fence is first galvanized and then vinyl coated for additional protection against corrosion, as well as adding a more aesthetic appearance. Vinyl coated fence is for yards, gardens, and pets, and blends well with the environment.

## Painted

Painted fence products offer an economic alternative when project longevity is not a primary concern. Painted fence products are typically not galvanized, and include items such as studded T-posts and U-posts. Paint provides a minimum protective coating over steel, while offering a different appearance than galvanized or vinyl coated products.

## Select The Right Mesh

Fence wires are woven or welded into uniform patterns called meshes. Choosing the correct mesh or spacing of the fence wires is critical. To determine the optimal gauge and mesh for your project, be sure to consider; (1) what you will enclose, and (2) how flexible or inflexible (rigid) the fence needs to be. A basic rule of thumb is, the larger the animal, the larger the mesh and the more rigid the fence should be. The opposite is true for smaller animals.

All Grip-Rite wire fencing is made from recycled steel.

## Mesh Design

Fence is constructed by forming the wire into uniform patterns called "mesh".

## Square Mesh

Wire is either "knotted" or welded to form squares or rectangles vertical or horizontal. This mesh pattern is used mostly with heavier gauge wire.

## Hexagonal Mesh

(commonly called netting) Typically made of a light-weight wire that is woven to form a hexagon.

## Knot Design

Many heavy gauge wire fences are made by tying sections of wire together with "knots". There are two common types of knots used, each with specific advantages.

## Square Knot

This construction prevents the fence from buckling or sagging. One-piece vertical stay wires are tied to line wires and crimped at the joint to prevent slippage.

## Hinged Knot

This knot acts as a "hinge" that gives under pressure, then springs back into shape. Vertical wires are individually cut and wrapped on the line wires.

- Vinyl coating over galvanized wire provides additional protection from corrosion and blends well with the environment
Ideal for home projects, garden use, and the workshop
Pre-cut sizes from 5 feet are very popular at retail

| TPG90125WS | $1.25 \mathrm{lb} . / \mathrm{ft}$. | 9 ft . |

## Light Duty U-Posts

$\square$ Rolled design and tough green enameled finish over 14 gauge steel equates to added strength and durability
$\checkmark$ Tabs punched every 6 inches, with spade for stability
$\square$ Residential and commercial applications, including signage, mail box, flower and vegetable garden border, and animal fencing

| SKU | Height | Color |
| :--- | :--- | :--- |
| Painted |  |  |
| UP36LD | 36 in. | Green |
| UP48LD | 48 in. | Green |
| UP60LD | 60 in. | Green |
| UP72LD | 72 in. | Green |

Accessories

## T-Post Clips

$\square$ Post clips circle the fence post to securely hold the fence in position
$\square$ Suggested use: 5 clips per post

| SKU | Gauge | Pieces/ <br> Bag |
| :---: | :---: | :---: |
| Galvanized |  |  |
| TPCLIP1225 | 12 | 25 |

## T-Post Driver

$\nabla$ Steel sleeve rides over the post and guides hammer action to safely drive the post into the ground
$\square$ Eliminates the need to dig holes and simplifies installation
$\square$ Handles situated at a convenient $120^{\circ}$ setting
V Ear protection and gloves are recommended for safety

| SKU | Description | Length | Weight |
| :--- | :--- | :--- | :--- |
| Painted |  |  |  |
| TPPWH | Red with handles | 24 in. | 17 lb. |
| TPPWHHD | Red with handles | 31 in. | 21 lb. |

## Poultry Netting Staples

$\square$ For attaching poultry net (a.k.a. chicken wire)
fencing to wood
V Made to conform to ASTM F1667
